### **DETAILED ACTION**

1 A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/8/2004 has been entered.

### **EXAMINER'S AMENDMENT**

2 An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rita Vacca on April 5, 2004.

The application has been amended as follows:

#### **In the claims:**

In claim 1, in line 3, replace "weight percent or greater" by -- to about 2.5 weight percent--.

In claim 9, page 4, in line 3, replace "weight percent or greater" by -- to about 2.5 weight percent--.

In claim 17, page 6, in lines 1-2, replace "weight percent or greater" by -- to about 2.5 weight percent--.

Art Unit: 1751

In claim 19, in lines 4-5, replace "weight percent or greater" by -- to about 2.5 weight percent--.

3 Claims 1-5 and 7-19 are allowed.

#### STATEMENT OF REASONS FOR ALLOWANCE

4 The following is an examiner's statement of reasons for allowance:

Riedhammer et al. (US 4,820,352) teaches an aqueous cleaning composition comprising an effective amount of an antibacterial agent to provide antimicrobial effect (see col. 4, lines 45-48) and osmolyte compound of sodium chloride in the amount of 6.75 gm/L (see col. 6, Example I-III). However, patentee differs from applicant in that Riedhammer et al, does not teach or suggest a cleaning composition comprising an effective amount of 0.9 to about 2.5 weight percent of an osmolyte compound to enhance the cleaning efficacy of the solution without adversely affecting the antimicrobial efficacy of the solution as required in the amended claims. Further, the applicant shown on record that at least one tonicity-adjusting agent such as sodium chloride in the provided concentration ranges (0.9 to 1.5%), increase the cleaning efficacy of the solution (see page 6, the table). Accordingly, the claimed subject matter as a whole would not have been obvious to one having ordinary skill in the art of cleaning and disinfecting solutions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
